

Dear Seton Families,

The health and safety of our Seton Catholic Community is extremely important. In response, Seton Catholic is in communication with the Archdiocese of Milwaukee as they prepare a Coronavirus Response Plan. We are asking students, staff, and families to take personal responsibility for helping to slow the spread of all flu viruses by practicing good hygiene to keep from getting sick and to protect others from illness. A continued theme from public health officials is the reminder that it is currently cold and flu season and getting vaccinated for the flu remains important. We also recommend everyday preventive measures to help decrease the spread of respiratory viruses, including:

- Frequent and thorough handwashing with soap and water. Use hand sanitizer if soap and water are not available.
- Get your flu shot
- Stay home when sick
- Cover coughs and sneezes with a tissue or your sleeve
- Clean frequently touched surfaces and objects

Families are encouraged to keep students home from school when sick. When reporting an ill student, please let us know if your child has influenza or symptoms of another illness (e.g. fever, cough, vomiting), as this helps us monitor illness trends and implement appropriate prevention steps. There may be some instances when a student's illness triggers an attendance form letter. Please know that, while we are mandated to track attendance closely, the health of your child (and of others) takes precedence. If you have specific questions about an attendance letter, please contact Dr. Nardi.

While the risk to the general public remains very low, we are ready to respond to increased illness in our school should we experience it. If we have a situation of significantly increased illness, or if there were local cases of COVID-19, we will work closely with the Archdiocese of Milwaukee and the Sheboygan County Health Department to follow and adhere to their directions. Please know that we are actively evaluating our plan responses, continuing prevention and cleaning strategies, and conducting symptom surveillance.

Spring Break is approaching. If you have travel plans, please stay up-to-date on any concerns by visiting this link to the [CDC's Travel Advisory Page](#).

The COVID-19 situation is evolving and changing. We understand there is uncertainty involved in this situation. We encourage you to follow trusted websites like the CDC for the most current information about COVID-19.
